Group Projects:

Document Validation:
- I build a web app using Python, Django, OCR, MongoDB, and CSS. This app is capable of accurately identifying documents by scanning them directly from a camera.
- In this app, I train a model that can identify and extract text from documents and store it in the database.

Online Banking System:
- It is fully functional Online banking app that build using PHP, HTML, CSS, JAVASCRIPT, MySQL.
- We can see all the statements, Account Balance, Transfer Fund using this web application.
